

Resident information no. 1

Information about start-up of our works on the property

Our construction works have now been initiated, and this is your first resident information. Soon, you will be meeting our workers, architects and construction management in your buildings.

As one of our first priorities, our contractor will be establishing an information station outside the gate between Ved Skansen 1 and 3, where you can find details about safety at and around the construction site as well as the layout of the construction site.

Works on the basement will start up in week 45 with construction unit A and then construction unit C and finally construction unit B. As from week 48, there will be construction activities in the entire basement.

Very soon, the contractor will be marking the areas in the basement where we will be working, and the area will be inaccessible to you. At first, your bicycle parking, laundry room and community room will not be affected.

Initially, we will be working around your bicycle basement parking, and you will be able to utilise these areas as usual until further notice. We are working on a permanent solution for roofed bicycle sheds and on a solution for the duration of the construction phase of which you will be informed as soon as possible.

Information to you who have belongings in the gym

We expect very soon to receive our demolition permit for the badminton gym. For now, we are working on clearing the gym which means that we will be contacting all residents with belongings in the gym. Such belongings will be moved to a temporary storage in the attic. We will arrange for this moving, as also appears from the separate notice to the relevant residents.

Timeline - outline

The outline below is a guideline timeline of the contractor's work on sections A, C and B, respectively (please note the **order A, C and B**) as well as the basement. This outline will also be available from the contractor's information board.

The construction management will be temporarily located in the basement Ved Skansen 3 until a permanent site accommodation has been established.

Best regards

Arkitektfirma A/S Hune & Elkjær / Allan Wright / E: alw@h-e.dk
